* The parties, with the exception of Defendants Sigmapharm, InvaGen, Princeton, Amneal, and Watson, jointly propose a five-day consolidated trial on all validity and infringement issues, as it fits with the Court's schedule. Consistent with the current scheduling order, Sigmapharm, InvaGen, Princeton, Amneal, and Watson request separate 1-day infringement trials in view of the highly confidential nature of the documents and testimony that will be presented on the infringement disputes.
